Kage Innovation™ LLC
502 Simmon Dr. Osceola, WI 54020
kageinnovation.com
(844) 314 – KAGE

Kage Limited Warranty

Kage Innovation will repair or, at the option of Kage Innovation, replace those parts which prove defective due to material or workmanship under normal use for a period of two (2) years from the date of retail sale or date of invoice from Kage Innovation, whichever is later. Expendable items, such as rubber, or polyurethane are excluded from this warranty.

Kage Innovation warrants that the products manufactured by us to be in accordance with our published specifications or those specifications agreed to by us in writing at the time of sale. The obligation of Kage Innovation is expressly limited to repairing or replacing, at its option, any product not meeting such specifications within the warranty period.

LIMITATIONS OF WARRANTY AND DAMAGES

KAGE INNOVATION MAKES NO OTHER WARRANTY, EXPRESSED OR IMPLIED, AND MAKES NO WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE FACE HEREOF.

IN NO EVENT SHALL KAGE INNOVATION, BE HELD LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR FOR DAMAGES RESULTING FROM MISAPPLICATION, ABUSE, MISUSE, ACTS OF GOD, UNAUTHORIZED ALTERATION OF THE KAGE INNOVATION PRODUCT, OR SUBSTITUTION OF PARTS NOT AUTHORIZED IN WRITING BY KAGE INNOVATION.

To obtain service under this warranty the consumer must return the defective Kage Innovation product to Kage Innovation directly, the dealer from which the product was purchased or to any authorized Kage Innovation dealer, transportation and freight charges prepaid. Only Kage Innovation dealers are authorized to perform the obligations under this warranty with pre-authorization from Kage Innovation.

No person is authorized to alter or amend this warranty or to create any warranty other than that set forth herein without the expressed written consent of Kage Innovation.

Kage Innovation reserves the right to make improvement changes on any of our products without prior notice.

Important Notice for Bobcat® Users

Please note that for Bobcat brand machines the hoses should be routed through the **upper driver side hose clamp**, with the hoses elbows angled as shown. If a second option is needed route hoses through the **passenger hose clamp** shown in the second image. Once the hose routing is complete, adjust the hose length between the plow and the machine to be taught with the plow tipped all the way forward.

SF Skidsteer Assembly SB{SIZEINCHES}

Version#

Version Starting Serial #

Maintenance:

- ☐ Regularly check bolts for proper tightness
- ☐ Grease King Pin and Slot Plate every 30 hrs.

SF 2 Pin Tractor Assembly TB{SIZEININCHES}

Version#

Maintenance:

- ☐ Regularly check bolts for proper tightness
- ☐ Grease King Pin and Slot Plate every 30 hrs.

SF 3 Point Tractor Assembly 3B{size in inches}

Version# 5

Maintenance:

- ☐ Regularly check bolts for proper tightness
- ☐ Grease King Pin and Slot Plate every 30 hrs.

SF Loader Assembly LB{Size Inches}

Version# 13

Maintenance:

- ☐ Regularly check bolts for proper tightness
- ☐ Grease King Pin and Slot Plate every 30 hrs.

1	Male Ag Coupler	19-400	2
2	Line Valve to Dist Block	1-765	2

Poly Cutting Edge Kit
KTSBP120

Version# 29

Note: When the polyurethane cutting edge is used on the Blade and in conjunction with the SnowKage, the Snow Catch Angle must be adjusted towards the front of the SnowKage. This creates enough space and prevents harmful contact between the Snow Catch Angle and the Poly Cutting Edge.

Item Number	Part Name	Part Number	Qty
1	Carriage Bolt, 5/8-11 x 3	90185A818	12
2	Flange Locknut 5/8-11	3221357	12
3	Universal Cutting Edge Support	556-PT-120	1
4	Poly Edge	PU-UNV1-120	1

SF Moldboard Assembly
SFM{SIZEFEET}

Version#
Version Starting Serial #

The Back Drag Kit is an upgrade option.
The kit does not come with a standard Kage unit.

Item Number	Part Name	Part Number	Quantity

SnowKage Cam-Lock Bracket Installation Instructions **For BOSS® and Falls® Plows**

1. Attach snow plow to skid steer. Position the moldboard straight.
2. Position Cam-Lock brackets on the back radius of the moldboard, pushed up against the top front most support channel of the plow (Fig. A). The center of the Cam-Lock bracket should be 16.5" away from the centerline of the plow moldboard (Fig B). Hold them in place using a C clamp, vise grip, or the likes.
3. Mark the center of the holes in the Cam-Lock bracket on the moldboard of the plow using a 3/8" drill bit or center punch.
4. Drill pilot holes in the moldboard using a 3/16" drill bit. Finish holes with a 3/8" drill bit. Paint or silicone holes in moldboard to prevent rust.
5. Bolt Cam-Lock brackets firmly into place using the gr 5 1½" x 3/8 bolts, with the bolt head and large washer on the front side of the moldboard.

Operator Instructions

To release the SnowKage raise boom approximately 5', tilt plow down until Kage box unit swings freely (must tilt approximately 50 – 60 degrees). Gently set Kage box down using the *vertical* motion of the boom, (rather than the curling motion of the attachment plate).

To attach the SnowKage, raise boom approximately 5', tilt plow down until the Snow Kage plow hooks become visible. Align, and position plow brackets underneath mating hooks of the SnowKage. Using *vertical* motion of boom, pick up the SnowKage, *then* curl the plow back into normal position.

Rubber/Poly Wear Edges only need to be replaced or adjusted when cutting edge of plow is replaced/adjusted. Replacement wearable parts can be purchased by calling Kage Innovation at 844-314-KAGE .

Down Pressure on plow is still possible. However, operator must not lift front wheels of machine off the pavement excessively (when the SnowKage is attached to the plow), as this could result in unwanted leakage of snow from edges of plow

Rough terrain should be avoided at high speeds (when the SnowKage is attached to the plow), as this can cause excessive bounce, simulating 'release tilt' necessary to release the SnowKage.
