

# KAGE® Wheel Kaddy™ Commercial Mower Sully

## OVERBUILT BY DESIGN

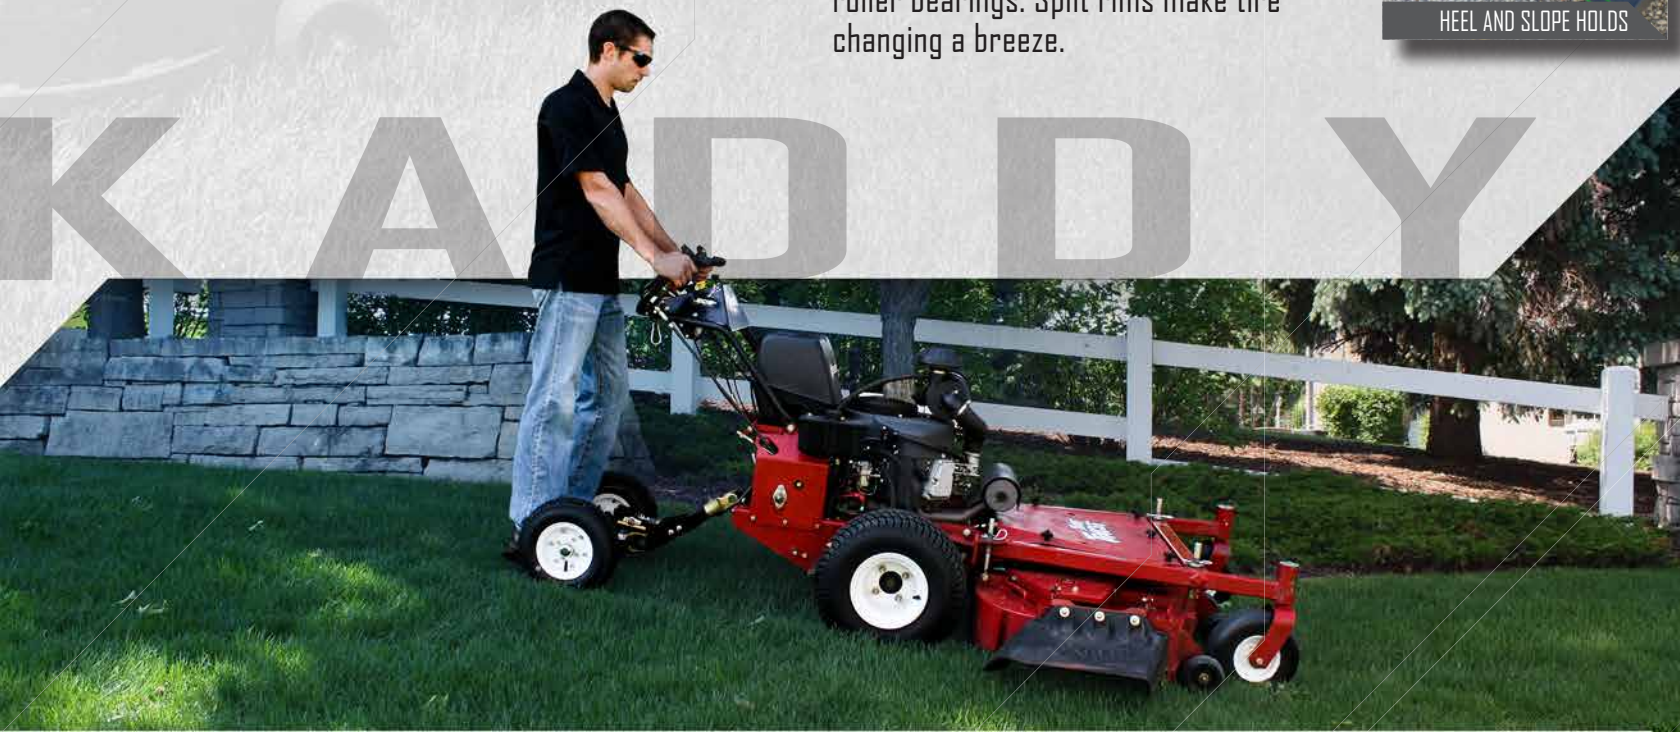

We designed the KAGE Wheel Kaddy with two things in mind: Increased life expectancy, and reduced down time. That is why this sully utilizes automotive-grade components, such as tapered roller bearings, drive-train (PTD) pivot yokes, and a grade 50 steel platform. Experience less down time plus a more comfortable ride because of our designed-by-the-user approach!

**SPACIOUS PLATFORM** has an anti-slip coating, and plenty of room for the largest of steel toe boots.

**HOLD SLOPES** Not only is the platform spacious, but it has heel and slope holds to help keep your feet secure.

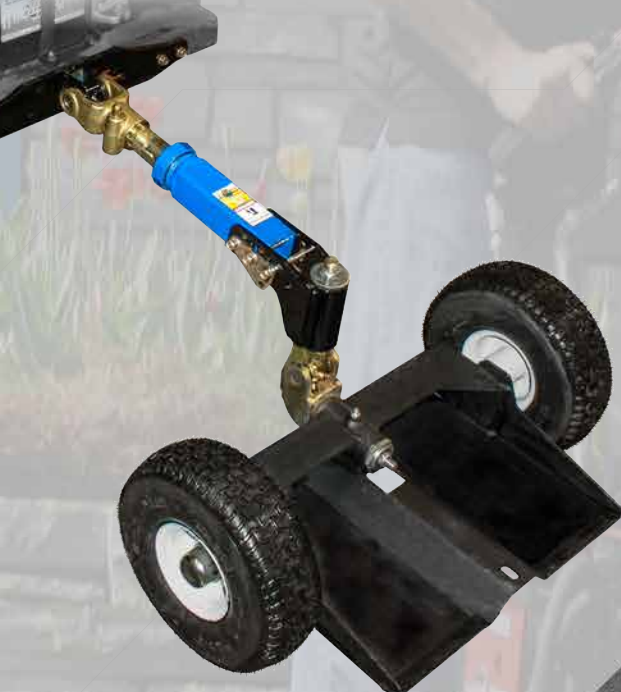

**ADJUSTABLE SUSPENSION** feature keeps the operator going strong all day without side-aches and knee fatigue.

**3 PIECE WHEELS** feature tapered roller bearings. Split rims make tire changing a breeze.

# WHEEL KADDY SPECIFICATIONS & FEATURES

360 PIVOTING ACTION

360 INTEGRATED SUSPENSION
