

KAGE KATCHER

KAGE®

THE KAGE ADVANTAGE

The KAGE Katcher is a one of a kind, patent pending grass clipping, leaf and trimming collector for mowers of numerous styles and brands. This simple grass catcher allows you to collect and dump leaves, clippings and trimmings on the go!

Use the handy rocker switch to activate the electric dump mechanism. Open the mechanism to dump, or leave it open to allow the clippings to disperse without collecting them! This simple system allows the operator more time for cutting and collecting by reducing time spent unloading and dumping.

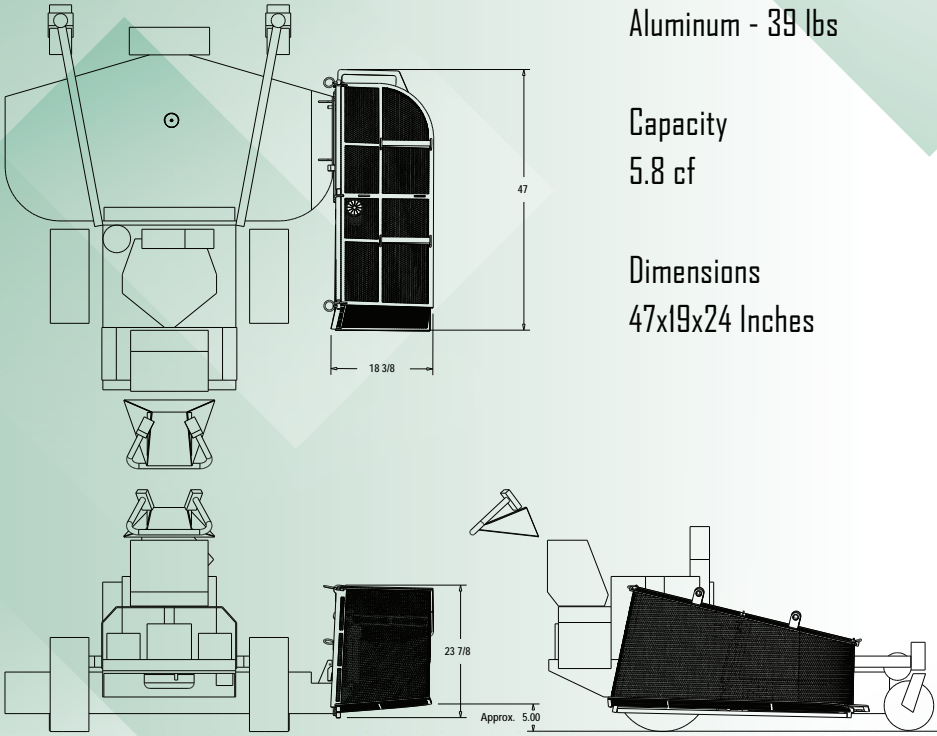

Key Features

- Electric actuator gives operator full control of dumping on the fly!
- By leaving the KAGE Katcher open, the operator can easily switch from collection, to lateral dispersion of the clippings.
- Large handles for fast removal and storage.
- Simple connections to battery posts allow the operator to install or remove the KAGE Katcher within seconds.
- Magnetic switch mounting bracket is easy to customize to provide ergonomic positioning of the control switch.
- 2 year structural warranty
- Large 5.8 c.f. capacity thanks to the 400 lb lift of the actuator.
- The bottom of the KAGE Katcher is angled up from the ground to accommodate ditches and slopes.
- Mounts to Walk Behind, Stand On & Zero Turn Mowers of various brands.
