

ADJUSTABLE SUSPENSION feature keeps the operator going strong all day without side-aches and knee fatigue.

OVERBUILT BY DESIGN

We designed the KAGE Wheel Kaddy with two things in mind: Increased life expectancy, and reduced down time. That is why this sulky utilizes automotive-grade components, such as tapered roller bearings, drive-train (PTO) pivot yokes, and a grade 50 steel platform. Experience less down time plus a more comfortable ride because of our designed-by-the-user approach!

SPACIOUS PLATFORM has an anti-slip coating, and plenty of room for the largest of steel toe boots.

HOLD SLOPES Not only is the platform spacious, but it has heel and slope holds to help keep your feet secure.

3 PIECE WHEELS feature tapered roller bearings. Split rims make tire changing a breeze.
