

SNOWSTORM™ BLAST STEEL SNOW PUSHER

Push & Scrape With the Strength of a STEEL Warrior

Like a superhero with unmatched strength, unshakable durability, and an iconic blue suit—the KAGE® SnowStorm™ BLAST STEEL embodies power and resilience in every detail.

Clad in bold blue and forged from rugged steel, this snow pusher stands as the hero of snow removal, tackling the toughest conditions without backing down.

Oscillation, floating side panels and trip cutting edges let it contour smoothly to uneven surfaces, maintaining consistent contact and clean results.

This KAGE pusher is engineered to perform & endure and is instantly recognizable in its bold blue armor— a true champion of strength in the fight against snow, ice and other winter injustices.

KEY FEATURES

3 Attachment Options

Attach to various types of equipment with the floating quick attach, 3-point hitch, and bucket clamp options.

Oscillation

With 12 degrees of oscillation, the SnowStorm BLAST seamlessly maintains contact with the substrate - even on side slopes.

Floating Side Panels

These curb accommodating side panels allow the operator to clean right up to the curb without interference.

3-Piece Steel Shoes

Extend the life of your shoes with the 3-piece, Hardox® steel shoes design that is reversible with easy bolt-on and off replacement.

AdvantEDGE (optional)

KAGE's sectional cutting edge contours through independent 18" or 24" cutting edges that oscillate and float. Hardox™ or Carbide options available.

90-Degree Split Trip Edge

Save the operator from impact & protect the machine while keeping the load as it rolls over curbs and other obstacles.
