

Ground Breaking Design

The KAGE GreatER Bar makes it easy for the operator and removes the potential of hydraulic failure or problems through:

- Mechanically activated Quick Rip Bar
- Automatically retracting teeth when moving backwards
- Bucket hooks for carrying bucket from job to job.
- Critical locking parts made from HARDOX™ steel
- Replaceable bolt-on cutting edges
- Replaceable rip teeth caps.

Bucket Holding Claw

“Easiest Grader Bar to use”

GreatER for Leveling

- Gravel Roads, Driveways & Parking Lots
- Sand Driveway & Horse Arenas
- Dirt Construction Sites, Deer Food Plots & Trails
- Clay Motorsport Tracks

Mechanically Activated Ripper Tooth Bar

We make it easy...

No Manual or Hydraulic Ripper Teeth
